

PROVEN TRAUMA/CRIME SCENE CLEANUP PROCEDURES

Follow these steps to quickly clean and neutralize odor molecules due to trauma, hoarding, crime scene clean up and other malodors.

(Refer to product label, SDS and User Guides for specific instructions.)

INITIAL ODOR REMOVAL

Malodors need to be knocked down first to help return to pre-loss condition more quickly. Use the Thermo-Gen VF Fogger with ODORx® Thermo-55 Citrus or Neutral to help create a vapor barrier that prevents malodors from permeating living spaces before you start to clean. In addition, you can sprinkle Crystal Odor Counteractant Commercial Crystals in the affected area. COC combines chemical odor neutralizers and natural absorbents in a long-lasting, ready-to-use dry deodorizer that's effective against sewage, putrefaction and more.

7-STEP TRAUMA CLEANING AND DECONTAMINATION PROCESS

Step 1: Apply BotaniClean, Mediclean® Germicidal Cleaner Concentrate or Milgo Plus on surfaces/objects previously soiled with blood/body fluids as a deodorizer/cleaner according to label directions.

Step 2: Remove gross contamination.

Step 3: Clean affected areas, e.g., painted walls, cabinets and drawers, with Unsmoke™ Wall Wash with BioSolv and ODORx Double-O. Wall Wash contains proprietary brightening and deodorizing agents to clean surfaces and it is ready to seal or paint when dry. Double-O effectively counteracts trauma odors, putrefaction and protein odors.

To remove blood stains on carpet, upholstery, tile & grout and even metal, use Unsmoke Degrease-All with Double-O. Degrease-All contains corrosion inhibitors to prevent rust on metal and is also effective for blood stains on high gloss paint.

SUCCEED WHERE OTHERS HAVE FAILED WITH THE ODORx ODOR REMOVAL PROCESS.

Developed to address malodors from trauma, putrefaction, hoarding and related jobs.

Step 4: Rinse surface with clean water.

Step 5: Thoroughly clean again with Wall Wash or Degrease-All with Double-O. After cleaning, if extreme odors persist, apply Liqui-Zone to surfaces – it's a chlorine dioxide oxidizer that is highly effective on dead body odors, skunk odors, charred wood and more.

Step 6: Rinse surface with clean water.

Step 7: Finish by applying BotaniClean, Mediclean Germicidal Cleaner Concentrate or Milgo Plus on surfaces and objects previously soiled with blood/body fluids.
